¹ Summary report includes:

- Results of all assessment instruments
- Diagnosis including description of current symptoms and strengths
- Severity Level
- General recommendations

Additional information in full report:

- Summary of family, medical and developmental history
- Summary of previous interventions
- Full record of information obtained from assessment instruments
- Appendix outlining tailored recommendations i.e. strengths and support needs across functional areas for NDIS planning purposes

For school entry it is highly recommended that a cognitive assessment is included in My Support Profile

² When combined with an Autism Assessment or My Support Profile the cost for a cognitive assessment is available at a reduced price of \$600.

^{3,4,5} Speech and language assessments and/or occupational therapy assessments can be added on to an Autism Assessment for those wanting a multi-disciplinary assessment report.
